Mott MacDonald Group*

Improving  
health  
world-wide

#### Introducing HLSP

HLSP is a professional services firm specialising in the health sector in both the UK and world-wide. It is a member of the Mott MacDonald Group, a global consultancy covering areas as diverse as education, water, sanitation, infrastructure and the environment. As a member of the Group, HLSP has access to a wide range of complementary disciplines to address a range of issues. Mott MacDonald works with governments, funding agencies, banks, utilities, transport authorities, developers and commercial companies and can offer clients the benefits of a 'one-stop-shop' and a world-wide network of offices.

#### A powerful partnership

Together with our colleagues in Mott MacDonald's education, market research, environment and business consultancy teams, HLSP can provide specialist knowledge and support in areas such as healthcare strategy, planning and inspection, clinical service organisation and delivery, health impact assessment, procurement, contracting and systems re-engineering, cost and project management and regulatory compliance as well as all aspects of planning, designing, managing and supervising the construction of healthcare buildings.

## Positive impacts through practical solutions

Around the world, policy makers, commissioners and providers of health services are struggling to meet the rising costs of healthcare and the impact of aging populations. They have to balance the need to ensure the poorest sections of the community have access to adequate healthcare against increasing societal expectations. They need to find an appropriate balance between public and private healthcare delivery. They need to address fundamental issues about public health and equity. Irrespective of the level of funding or the preferred system for generating revenues (taxation, third party social insurance, co-payments), these are generic issues facing governments world-wide.

HLSP provides technical assistance and hands-on programme management to assist with both high level policy making and operational delivery issues. HLSP can provide advice on public health issues, needs assessment, economic modelling, cost benefit analysis, system redesign and delivery, strategy and business planning and applied research. In doing so it draws on over 20 years' experience of working in over 100 countries across the world.

Our consultants have diverse backgrounds in the UK National Health Service (NHS) and independent sector and from a wide variety of related disciplines. All have first-hand experience and knowledge of health and healthcare, backed up by our extensive networks in the UK, Europe and beyond.

## Our track record

HLSP has over 20 years' experience working in the health sector world-wide. With an unrivalled reputation for delivering to deadlines and adding value, HLSP benefits from the wealth of multi-disciplinary skills of parent company Mott MacDonald.

Examples of recent projects and assignments across the UK, Europe, Africa, Asia and the Middle East include:

- A two year programme to deliver UK-based clinical training for doctors from conflict countries on behalf of the UK Department of Health providing customised training in NHS and independent providers across the UK and change management training to deliver long-lasting benefits in the originating countries.
- Providing training in epidemiology of infectious diseases across Poland, as part of the wider EC PHARE 'Modernisation of communicable diseases surveillance and control system programme'.
- Quality assurance of clinical nurse training for the Nursing and Midwifery Council of England developing a novel risk-based approach to targeted inspections and re-approvals of Higher Education Institutions.
- An analysis of innovative models of home care for the Ministry of Health in Catalonia, Spain, to assist in developing more cost effective and efficient services.

- Construction of a new PFI hospital in Portugal including the provision of facilities management. The contract involved due diligence of the local healthcare economy and all aspects of clinical service delivery and monitoring construction and operations.
- A feasibility study to develop a new private hospital on an existing, redundant, London hospital site. On the strength of the study, the client proceeded with the purchase and the development of the site.
- Comprehensive expenditure analysis for Kenyatta National Hospital, Nairobi, Kenya. Clearly documenting expenditure trends, service delivery, utilisation patterns, and areas where cost savings can be made without compromising services.
- Management training programme in Namibia for DFID. Delivering a university accredited management training programme to 180 learners, using UK materials adapted to be relevant to the local context.
- Building management capacity in Pristina University Hospital, Serbia, through advising, training, and developing systems, particularly in the areas of human resources, financial systems, nurse training and management.
- Supporting the Albanian Order of Physicians to establish its role as a professional body and effective partner with the Ministry of Health. Focusing particularly on improving communications, financial management and registration procedures.
- Health systems strengthening in Nigeria for the 5½ year DFID-funded PATHS programme. Initiatives include a consultancy designed to strengthen finance and budgeting systems for health by assisting the Ministry of Economic Planning prepare a new budget code for Kaduna State.
